

Avonshire Woods

Location

Avonshire Woods Facility 2, constructed in 2005, is located off Avonshire Court in Eldersburg in the South Branch Patapsco watershed.

Description

The proposed retrofit will bring the existing surface sand filter facility up to current standards, optimized to provide water quality volume and channel protection and management of the 2- and 10-year storm events back to forest/meadow conditions. The drainage area is approximately 9.41 acres, 1.79 of which are impervious.

Project Engineer

Wallace Montgomery & Assoc.

Contractor

TBD

Project Budget

Engineering: \$107,755

Updates

Kick-off meeting held April 2026. Concept design is ongoing.
