

Manchester East

Location

This new stormwater management facility is planned on property located in the vicinity of Grafton Street and Long Lane in the Town of Manchester. The site drains to George's Run, a Use Class III-P: Nontidal Cold Water and Public Water Supply.

Description

A new surface sand filter or wetland stormwater management facility will be implemented on the property. The goal is to provide maximum water quality treatment, channel protection, and management of the 2- and 10-year storm back to forest/meadow conditions for the 104-acre drainage area, including 37 acres of impervious. There are also flooding issues during rain events and erosion at existing outfalls.
