Explanation of Active Capital Projects

The FY 22 – 27 Community Investment Plan (CIP) includes capital projects with FY 22 appropriations and projects that have planned appropriations in FY 23 - 27. If a project included in this CIP had an appropriation in a previous fiscal year, that dollar amount is included in the column labeled Prior Allocation. The following summary is intended to provide additional information on active capital projects that are not included in the current CIP and have existing appropriations prior to FY 22. Several projects listed on the summary are ongoing projects and receive an additional appropriation annually.

Project

The project number is a number assigned to the capital project to identify it in the County financial system.

Project Name

The project name is a short text identification of the project.

Initial Year of Appropriation

The initial year of appropriation is the first fiscal year that a capital project received funding. Some projects may have received funding in more than one year. However, only the first fiscal year of funding is shown.

Current Budget

This is the total existing funding appropriation to a capital project. If the project received appropriations in more than one year, it is the total of those appropriations.

Expended to Date

Expenditures to date are the total amount spent on a capital project so far. The amounts included in this summary are through May 21, 2021.

Current Encumbrance

When the County enters a contract or makes other commitments to purchase goods or services, the committed amount is encumbered, indicating it is not available for other expenditures. Current encumbrance is the total amount the County has committed to spend on a capital project beyond expenditures spent to date.

Current Balance

Current balance is the amount of the budget that has not been spent or committed. It is calculated by subtracting expenditures to date and current encumbrances from the current budget.

New Projects Mid-Year

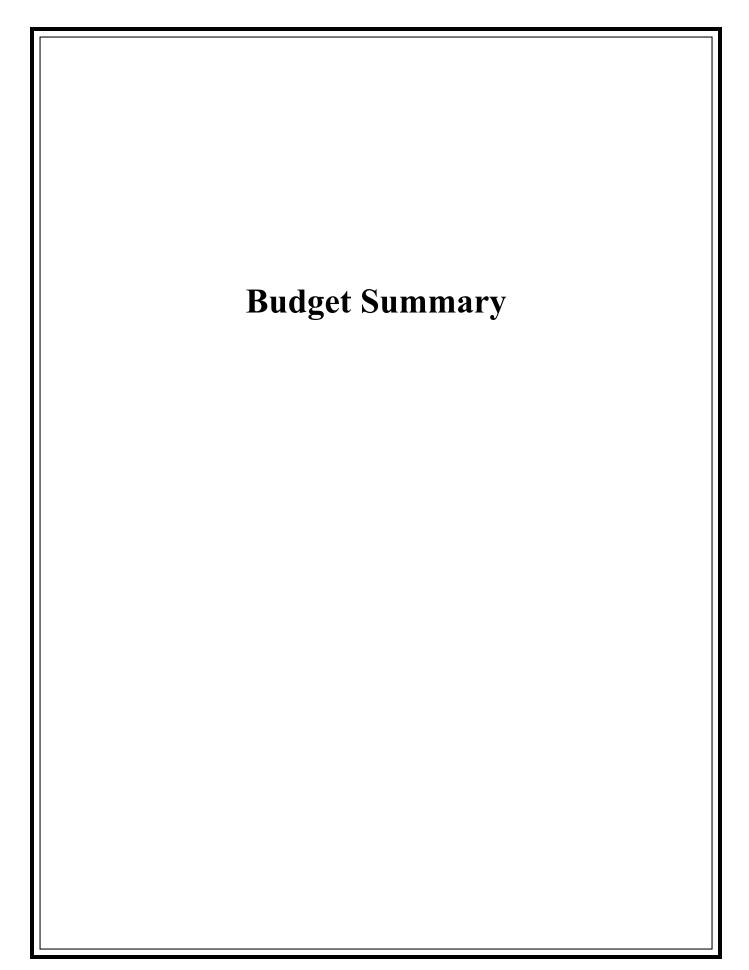

The following is a list of all the new projects created during FY 21. In some cases, issues and outside events arise and a project cannot wait for the capital budget funding cycle, leading to the creation of a capital project between July 1 and June 30. In other cases, funding is appropriated into an existing capital project with an unspecified scope, such as with the Community Self-Help Project (SH) (9735). An administrative transfer then occurs to move the existing funding to the various individual self-help projects during the fiscal year as the projects are more fully defined.
