

## Overview of General Government CIP

The General Government portion of the Community Investment Plan (CIP) addresses capital projects that do not specifically fit in one of the other five categories: Recreation and Parks, Public Works, Board of Education, Conservation and Open Space, and Enterprise Funds. General Government projects are typically related to Public Safety 911, Carroll Community College, Carroll County Public Library, Sheriff's Office, State's Attorney's Office, Technology Services, Senior Centers, and other County facilities.

Included in the FY 19 – 24 CIP is funding for technology improvements for County Government, Carroll County Public Library, and Carroll Community College, systemic improvements, replacements, and renovations for County facilities, including generators, roofs, HVAC components, and parking lots. In FY 19 – 21, funding is included for systemic renovations at Carroll Community College, including fire alarm upgrades, boiler and chiller replacements, building envelope restoration, and a replacement roof.

Additional phases to the Public Safety Training Center in FY 19 – 22 include parking lots, a multi-story burn building, an outdoor classroom, and training props.

Funding is included in FY 19 to implement audio visual equipment for the five Circuit Courtrooms and to modify case management software for State's Attorney's Office in order to accommodate the State-mandated Maryland Electronic Courts case management system (MDEC).

Included in FY 19 is funding to renovate the Winchester building for the Offices of the State's Attorney and Sheriff.

For additional information on General Government projects, please refer to the individual project pages.

# Public Safety Regional Water Supply

Lynn Karr, Senior Management and Budget Analyst (410) 386-2082

9022

This project provides ongoing funding for the installation of water tanks and dry hydrants throughout the County. Tanks are installed as potential sites are found that coincide with strategic locations identified within the various fire districts. The tanks provide a 30,000 gallon source of water to support firefighting operations within communities that are otherwise void of a reliable water supply source. To date, seven tanks have been installed.

Dry hydrants use sources, such as streams and ponds, to access water for use in firefighting activities in areas that are otherwise without a readily accessible supply of water. Dry hydrant projects generally include the installation of PVC pipe on a bridge structure and are used to draft water from the stream below.
