

Public Safety Training Center

Location

The Public Safety Training Center is located on Washington Road in Westminster in the Liberty Reservoir Watershed.

Description

The existing wet pond was not designed to provide water quality treatment. The drainage area to the facility is 30.81 acres, 14.08 of which are impervious. MDE has raised concerns about the PFAS concentrations on the site. The County is proposing to retrofit the existing wet facility to a surface sand filter facility supported by a geosynthetic liner to prevent infiltration of the stormwater. The facility has a drainage area of 300 acres, 83 acres of which are impervious.
